

CARBONITE ONLINE BACKUP

What is Online Backup?

Online backup solutions provide protection for your computer files so you can get those files back in the event of a data disaster – saving you time, money and stress. Unlike other antiquated methods of data backup – such as external drives & CDs - there's no hardware to buy, no cables to connect, no training or maintenance required.

Why Carbonite?

Carbonite gives you secure, automatic offsite backup that protects your files from accidental deletion, spills, theft and just about anything else that could harm your data. Once installed, Carbonite backs up your files to the cloud – so you can get them back when you need them most. Because Carbonite works continually, backing up new and changed files whenever you're connected to the Internet, you can rest easy knowing your backed up files are always protected.

Since 2006, Carbonite has backed up over 200 billion files and today, backs up more than 300 million files each day! Most importantly, Carbonite has restored over 7 billion files that otherwise would have been lost forever.

Safe, secure and completely automatic. Carbonite is The Better Backup Plan™

Product Highlights:

- **Set it & forget it.** Carbonite backs up your files automatically to the cloud - so you never have to remember to back up. No hardware required.
- **Continual backup.** Whenever you're connected to the Internet, Carbonite backs up your files – eliminating potentially costly backup gaps created by daily or weekly backups.
- **Secure transmission.** Carbonite uses the same encryption technology used in online banking and e-commerce transactions.
- **Safe offsite storage.** Your backed up files are stored in one of Carbonite's highly secure state-of-the-art data centers which are guarded 24 hours a day, 7 days a week.
- **Easy file recovery.** If anything happens to any file, Carbonite finds it in your backup and puts it back in its original location on your computer – in just a few, simple steps.
- **Anytime, Anywhere access.** You can access your backed up files from any computer connected to the Internet — or even from your iPhone®, Android™ or BlackBerry® smartphone.

The Plans

With 5 plans to choose from, you can find the Carbonite subscription that's right for you. From individuals, families and students to home office users and small business professionals, Carbonite has a plan to fit every backup need.

Home

With the **Home** plan, you'll enjoy all the essentials of unlimited online backup. Subscribe today and your irreplaceable files on your computer - like photos, documents and music - will be backed up automatically, and accessible at anytime, from any computer or smartphone.

HomePlus

Using the **HomePlus** plan you'll receive all the benefits of the **Home** plan, PLUS additional features that make your backup more complete. With **HomePlus**, you can include your **external hard drive** in your online backup, so you can rest easy knowing that all of your important files are backed up safely, offsite. In addition, you also get **Mirror Image backup**, which creates a local backup of your entire hard drive - including your operating system and software programs.

HomePremier

HomePremier is the most comprehensive backup solution of the Carbonite Home plans. In addition to all the features of **Home** and **HomePlus**, you'll also get automatic backup of your video files (instead of having to add them to your backup manually). In addition, you'll have the option to use **Courier Recovery** - a Carbonite service reserved exclusively for **HomePremier** customers. Courier recovery allows you to have a copy of your entire backup shipped directly to you - which may be the fastest way to get your files back, when you need them most.

Business

The Business plan is geared toward those looking to backup an unlimited number of computers, external hard drives and NAS devices. Using this plan, you receive 250 GB* of backup space.

BusinessPremier

Using **BusinessPremier**, you'll experience all of the same benefits you receive from the **Business** plans. Now, in addition to backing up all of the computers, external hard drives and NAS devices in your business, you can also backup your **Windows Server**. Using this plan, you receive 500GB* of backup space.

With the **BusinessPremier** plan, you'll have the option to also purchase the **Enhanced Server Backup add-on**. The add-on, which shares storage space with the BusinessPremier plan, allows users the ability to protect the following Windows Servers, databases and live applications:

- Microsoft SQL Server 2000, 2005, 2007, and 2012
- Microsoft Exchange Server 2003, 2007 and 2010
- Windows System State – including Registry, Active Directory and more.
- MySQL Server 5.x
- Oracle Server 11i, 11g, or later
- Hyper-V Server 2008, 2012
- Windows NTFS files and folders

* Additional storage packs are available for both Carbonite Business plans
